AUTOMOTIVE

SAFETY
SECURITY
SURVEILLANCE

AURA - F.Z.C

Who we were?

We started our operations as a general trading company under Ajman Free Zone Authority, UAE in January 2015. It was purely a one man show while inception and slowly started growing with hands-on customers / dealers in GCC and Africa, where we were supported with 5 employees and an executive office with the same activity under Ajman Free Zone Authority. We were distributing various automotive accessories in some parts of Middle East and Africa.

Who we are now?

In this fifth year, realizing the fact that safety, security and surveillance in automotive sector along with various other sectors are very much needed in market and no other dedicated manufactures in the field of safety, security or surveillance are available from this area to easily accessible to the customers. So we started "the first and only manufacturing unit" in UAE backed by Ajman Free Zone Authority, where we could be able to develop various devices which can be used for safety and monitoring purpose.

We now developed safety, security and surveillance devices from our Aura facility, under the brand name – "Seqaura" powered by a powerful platform – "Auratraq".

Who we would like to be?

We would like to be the highly recommended and service oriented solution provider in MEA region with a clear vision of maintaining a healthy, secure and safe environment. We believe that our quality products and powerful platforms will make ourselves one of the main safety, security and surveillance solution provider, dedicated to Middle East and Africa region.

We want to be the trend setter by bringing new solutions very often and introducing them in MEA market and thereby ensure security and safety in Middle East and Africa roads and transport sector with quality products.

We will make sure, "our expertise and experience will make assets more safer"

SEQAURA VEHICLE TRACKERS

Ignition Sense & Remote Immobilization.
Remote data logging when no GSM.
Internal Battery Backup.
LED indicates for GSM & GPS and Main Power Supply.
Compatible for Driver Behavior Analysis.
AGPS for GPS Blind Area. (Triangulation/ LBS)
USB 2.0 Interface.
Towing Detection.
GPRS Command.
Configuration & firmware upload FOTA
Over Speeding Detection
High Gain GPS & GSM Antenna.
Real Time Tracking.
Small In Size.
Odometer.
Micro SIM.

SEQAURA SMB SERIES

SEQAURA SMA SERIES

Remote Data Logging when No GSM.
Inbuilt Protection against Voltage Spikes.
High Accuracy Internal Accelerometer.
High Gain GPS/GSM Antenna.
LED Indicators for GSM/GPS and Main Power Supply.
AGPS for GPS Blind Area. (Triangulation/ LBS)
1-Wire Temperature Sensor.
Configuration and Firmware Upload (Fota & via Cable).
Compatible for Driver Behavior Analysis.
Camera, RFID , Fuel sensor & Temperature sensor Integration.
Two-way Communication.
Normal SIM: 2FF

SEQAURA SPEED GOVERNORS

Better safety by avoiding over-speeding
Reduced strain on engines, thereby increasing the life of engines
Preventive rather than reactionary
Reduced pollution, improving the environment
Increased safety
Reduced fuel consumption
Reduced maintenance cost for the vehicle owners(s)
Improved operational efficiency

SEQAURA SL MODELS

LIMITED TO
70
MPH

SEQAURA SL RT MODELS

Better safety by avoiding over-speeding
Reduced pollution, improving the environment
Increased safety
Reduced fuel consumption
Speed records internally for 72 hours
Realtime online tracking option
Alerts and reports remotely

SEQAURA MDVR & CAMERA

SEQAURA VR BASIC / ADVANCED

1. Support 4CH Video & Audio synchronous input, 1CH Video & Audio synchronous output; 1CH VGA output, 1CH AV Output.

2. Support 4CH 1080P/4CH real-time local recording.

3. H. 264 video compression, Linux system, Hi3520DV300 processor.

4. 8-36V wide voltage power supply.

5. Continued video recording for 4s after sudden power off.

6. With excellent vandal resistant, Splashproof, dustproof functions.

7. Support 2.5 inch hard disk(at maximum 2TB storage)+1pc 256G SD card.

8. Automatic reset: System will recover to video recording state quickly after the power is on again; Even the instant power off does not affect the recorded video.

9. With full enclosed lock design, it can prevent the man-made sabotage effectively; Support mouse operating.

SEQAURA AV R CAAMERAS

AHD HD 2 million
1080P pixels: 1920*1080P
Inside camera, metal shell, shockproof
Rear/Front view camera, metal shell
Side mount camera, metal shell
(Outdoor cameras are waterproof)
