OUR HONESTY
OUR EXPERTISE
YOUR SAFETY

GPS VEHICLE TRACKING

Our tracking system is used for the vehicles to observe if it's on moving or idling or totally switched off mode and transmit data from 10 seconds sequence to the server. Users can view the current location, status and speed of the vehicles assigned to their usernames and also can generate multiple reports.

BASIC TRACKING

Basic vehicle tracking helps users to track multiple vehicles on available map in our tracking platform with real time location, status and speed. Users will get relevant reports and alerts on selected incidents.

ADVANCED TRACKING

Advanced vehicle tracking will help users to add more features like attendance, temperature, fuel monitoring and can switch off the vehicles thru our platform in emergency situation (only in safe condition).

OPTIONAL FEATURES

Some optional features can be added in advanced tracking.

- RFID attendance
- RFID driver assign
- Temperature sensor
- Door sensor
- Camera (still photo)
- Panic Button
- Immobilizer

WE HELP YOUR VEHICLES FULLY UNDER YOUR CONTROL

24 HOURS 365 DAYS ONLINE

We help you to solve any emergency situation regarding your vehicles with our GPS tracking system.

99% UPTIME

We ensure 99% up time with the best accuracy of your vehicle location with our GPS tracking platform.

100% CONFIDENTIAL

We promise you 100% confidentiality regarding your company and vehicles in our GPS tracking platform.

VEHICLE VIDEO MONITORING

Our video monitoring solution helps the transportation department or other authorities to view and analyse the indoor / outdoor movements from a staff / student / public transportation and to take necessary actions. These visuals are recorded and can be viewed realtime with help of internet connectivity.

FEATURES

There are more features that can be added to basic recorders. These options will be highly helpful in emergency situations.

- **LIVE MONITORING**
with the help of 3G/4G data sim card
- **ATTENDANCE UPDATION**
adding RFID module via ID cards
- **DRIVER IDENTIFICATION**
RFID card to all drivers
- **GPS LOCATION**
adding tracking module and platform

Cameras can be placed inside the vehicle, front and both sides to record and view realtime videos online. Also a reverse camera with monitor will help the driver to park the vehicle easily.

PARENTS CAN ALWAYS MONITOR THEIR CHILDREN

TRACK LOCATION

Parents can track the location and route of relevant school bus with our GPS tracking system

IN-APP ALERTS

Parents will get alerts on different incidents like route deviation, bus changes and other events.

100% CONFIDENTIAL

We promise you 100% confidentiality regarding your school and students in our GPS tracking platform.

SPEED GOVERNOR

A speed governor or speed limiter device help to measure and regulate the speed of vehicles. As per road transport authorities in almost all the countries, one of the major reason for road accidents are because of high speeding which results in uncontrollable situation when any unseen emergency happens.

Implimenting a speed governor will ensure safe transportation and it helps save fuel along with a lesser wear and tear of mechanical parts.

We have different types of speed governors suitable for different types of vehicles.

Electronic type speed limiters:

As new technology vehicles are having electronic pedal and can control the speed using electronic sensors, we have the electronic type speed governors.

Fuel controlled speed limiters:

Most of old model vehicles and some new vehicles like big buses we should use mechanical type fuel controlled devices to control the speed.

Cable type speed limiters:

For heavy equipments like forklifts, we are using cable type speed controlling devices for perfection and heavy duty purpose.
